

Oswaldo Hernandez

Senior Software Engineer | Backend & Data Engineering

Buenos Aires, Argentina — Remote | oswaldohernandez2909@gmail.com | linkedin.com/in/oswaldohernandez1104

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience specializing in backend and data engineering. Strong background in designing scalable microservices, architecting ELT data platforms, and building enterprise-grade data processing frameworks. Experienced in developing Java backend services, Snowflake data pipelines, distributed processing solutions, and system integrations for global enterprise clients. Passionate about building reliable, high-performance platforms through automation, reusable architectures, and modern engineering practices.

KEY ACHIEVEMENTS

- Built a Snowflake-based reconciliation pipeline that smooths daily sales curves and improves reporting accuracy.
- Led the migration from Jenkins to GitHub Actions, automating Flyway migrations, stored procedure deployments, and JAR publishing to Snowflake stages.
- Designed and implemented reusable Java frameworks integrated with Snowflake UDFs, accelerating the development of standardized data processing services across multiple projects.
- Developed an automated Java/JDBC testing framework that executes SQL validation queries across Snowflake data pipelines, significantly reducing manual testing while improving data quality.
- Implemented enterprise HR, Time & Attendance, and Payroll business logic, including attendance processing, payroll integrations, automated leave calculations, and production data fixes.

PROFESSIONAL EXPERIENCE

Software & Data Engineer — Svitla Systems, Inc. (Insite360 project) *Jul 2023 – Present | Remote*

Tech: Java, Spring, Snowflake, Kafka, MongoDB, Go, GitHub Actions, AWS S3, Angular

- Design, orchestrate, and manage end-to-end ELT data pipelines on Snowflake using Streams, Tasks, Stored Procedures, Views, and UDFs integrated with Java services.
- Develop reusable Java frameworks that integrate with Snowflake UDFs, providing standardized components for building scalable data processing services across multiple projects.
- Deliver automated reconciliation, real-time data processing, and exception-handling workflows supporting enterprise operational reporting.
- Led the migration from Jenkins to GitHub Actions, automating Flyway migrations, stored procedure deployments, and JAR publishing to Snowflake stages.
- Developed an automated end-to-end testing framework using Java and JDBC that validates Snowflake stored procedures and data pipelines through SQL execution, significantly reducing manual testing efforts.
- Contribute to Kafka → MongoDB streaming pipelines, Java/Go microservices, and Angular-based data delivery.

Java Developer — Ketos Delphin *Jun 2022 – Present | Argentina — Remote*

Tech: Java, Spring Boot, PostgreSQL, Redis, Jira, GitLab, Postman, Vue.js

- Develop backend services for a microservices-based enterprise platform covering Human Resources, Time & Attendance, and Payroll.
- Design and implement RESTful APIs with Java and Spring Boot supporting HR, attendance management, payroll, and workforce operations.
- Develop integrations with external systems through REST APIs, processing employee clock-in/clock-out events, payroll interfaces, CSV generation, and secure FTP file transfers.
- Develop and maintain scheduled background processes using an in-house job framework, leveraging cron scheduling and multithreading to execute high-volume business operations efficiently.

- Troubleshoot production issues by analyzing application logs, database records, and complex SQL queries while implementing backend enhancements and production data fixes.
- Collaborate with frontend, product, and QA teams using Jira, GitLab, Vue.js, and Postman.

Java Software Developer — Avalith (Full-time) Dec 2022 – Jul 2023 | Argentina — Remote

Tech: Java, Spring, SQL, Stored Procedures, Scrum, IBM Watson Discovery

- Delivered backend services for banking and insurance clients in regulated environments.
- Built a Java/Spring microservice from scratch integrating GetGuru Cloud with IBM Watson Discovery as a centralized knowledge source (Q&A, search).
- Maintained and extended a core health-insurance platform (Java 6/7) for member/client and plan management.
- Implemented and optimized SQL queries and stored procedures for complex business rules and validations.
- Worked under Scrum, balancing legacy constraints with reliability and performance improvements.

Software Developer — Arizmendi Nov 2021 – Dec 2022 | Argentina

Tech: Java, SQL, Reporting, Payroll/HR domain, CSV integrations

- Customized an HR/payroll web application based on the Hodeian payroll platform.
- Built bank accreditation payment files (CSV) under strict banking integration rules for salary payments.
- Developed payroll receipts and operational/financial reports based on payroll runs and employee data.
- Managed payroll and employee data via SQL, ensuring accuracy and compliance while translating HR/accounting rules into software.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Python, Microservices, REST APIs

Data Engineering: Snowflake (Streams, Tasks, Stored Procedures, UDFs), ELT, Kafka, MongoDB

Databases: PostgreSQL, SQL Server, Redis

DevOps & Cloud: GitHub Actions, Jenkins, AWS S3

Testing & Quality: Java/JDBC Test Automation, SQL Validation, Postman

Frontend Collaboration: Angular, Vue.js, JavaScript

EDUCATION

Engineering in Computer Science — Alejandro de Humboldt University (Venezuela) 2008 – 2014 (incomplete)

LANGUAGES

Spanish — Native **English** — Advanced (professional working proficiency)
