TECHNICAL SKILLS

Backend

Java, Spring Boot, Python,
Microservices, REST APIs

Data & Streaming

Snowflake
(Streams/Tasks/Procs/UDFs), ELT,
Kafka, MongoDB

Databases

PostgreSQL, SQL Server, Redis

DevOps & Cloud

GitHub Actions, Jenkins, CI/CD,
AWS S3

Frontend Collaboration

Angular, Vue.js, JavaScript

Testing

Cypress, Postman

LANGUAGES

- Spanish — Native

- Command Line & Terminal

EducaciónIT

- Java Spring; Java Web API;
Hibernate/JPA
- Scrum Fundamentals; Angular;
JavaScript Advanced
- SQL & Databases; Git
Collaborative Development

Oswaldo Hernandez

Software Engineer (Backend & Data)

Buenos Aires, Argentina — Remote

Professional Summary

Software Engineer with 5+ years of experience specializing in backend and data engineering. Strong background in building scalable microservices, designing ELT data pipelines, and delivering high-performance enterprise solutions. Proven experience working with international clients and data-driven platforms using Java, Spring Boot, Snowflake, Kafka, and modern cloud technologies. Recognized for leading complex CI/CD migrations, designing reusable backend frameworks, and implementing critical business logic for enterprise platforms.

Key Achievements

- Built a Snowflake-based reconciliation pipeline that smooths daily sales curves and improves reporting accuracy.
- Migrated deployment workflows from Jenkins to GitHub Actions (Flyway migrations, stored procedure releases, JAR publishing to Snowflake stages for UDFs).
- Implemented automated leave/vacation balance rules with real-time tracking and automatic deductions.
- Created a shared backend processing framework with concurrent processors/sub-processors to speed up Snowflake workloads.

Professional Experience

Software & Data Engineer — Svitla Systems, Inc. (Insite360 project)

Jul 2023 – Present | Remote

Tech: Java, Spring, Snowflake, Kafka, MongoDB, Go, GitHub Actions, AWS S3, Cypress, Angular

- Own end-to-end ELT pipelines in Snowflake (streams, tasks, stored procedures, views, UDFs) integrated with Java services.
- Deliver automated reconciliation and exception-handling flows (sales, deliveries, inventory) for accurate reporting and operational insights.
- Lead CI/CD migration from Jenkins to GitHub Actions for deployments to AWS S3 and Snowflake environments.
- Contribute integration tests with Cypress to validate end-to-end behaviors and data correctness.
- Contribute to Kafka -> MongoDB streaming views/pipelines, Go microservices for data serving, and Angular data delivery.

Java Developer — Ketos Delphin

Jun 2022 – Present | Argentina — Remote

Tech: Java, Spring Boot, PostgreSQL, Redis, Jira, GitLab, Postman, Vue.js

- Build backend services for a microservices-based HR platform for a major client in China.
- Design and implement RESTful APIs with Java and Spring Boot supporting core HR workflows.
- Integrate PostgreSQL (persistence) and Redis (caching) to meet performance requirements.
- Collaborate with frontend/product teams (Vue.js) and use Jira, GitLab, and Postman within agile delivery.

Collaborative Development

Java Software Developer — Avalith (Full-time)

Dec 2022 – Jul 2023 | Argentina — Remote

Tech: Java, Spring, SQL, Stored Procedures, Scrum, IBM Watson Discovery

- Delivered backend services for banking and insurance clients in regulated environments.
- Built a Java/Spring microservice from scratch integrating GetGuru Cloud with IBM Watson Discovery as a centralized knowledge source (Q&A; search).
- Maintained and extended a core health-insurance platform (Java 6/7) for member/client and plan management.
- Implemented/optimized SQL queries and stored procedures for complex business rules and validations.
- Worked under Scrum, balancing legacy constraints with reliability and performance improvements.

Software Developer — Arizmendi

Nov 2021 – Dec 2022 | Argentina

Tech: Java, SQL, Reporting, Payroll/HR domain, CSV integrations

- Customized an HR/payroll web application based on the Hodeian payroll platform.
- Built bank accreditation payment files (CSV) under strict banking integration rules for salary payments.
- Developed payroll receipts and operational/financial reports based on payroll runs and employee data.
- Managed payroll and employee data via SQL, ensuring accuracy and compliance while translating HR/accounting rules into software.

Education

Engineering in Computer Science — Alejandro de Humboldt University
(Venezuela)

2008 – 2014 (incomplete)
